TX Text Control is not shown in VS2010 toolbox

Gunnar Giffey - 2016-12-13 - 0 Comments - in Technical Articles

If the TX Text Control icons are not shown in the VS2010 toolbox, a .NET Client Profile is used in the project (either .NET Framework 3.5 Client Profile or .NET Framework 4 Client Profile).

TX Text Control however requires the full .NET Framework, so the solution here is to switch the .NET Framework in the project's properties.
